

ONE DAY SEMINAR ON
“ADVANCES IN MECHANICAL ENGINEERING”

Date: 10.08.2019

Time: 10.00 AM

Venue : B Block Seminar Hall

The Department of Mechanical Engineering organized a One Day Seminar on Advances in Mechanical Engineering and the topic was delivered by Dr. G. Amarendar Rao, Professor and Principal, Vignana Bharathi Institute of Engineering & Technology, Hyderabad on 10/08/2019 at Seminar Hall B-Block. All the students of B.Tech and M.Tech attended the Seminar. In his address, Dr. G. Amarendar Rao discussed the need of Thermal Engineering in IC Engines.

The Seminar incorporates with the must know about the economics of the components and processes design to make sure to provide an improvement over the existing solutions, but also to not to lose the company money. Thermal Engineers are not limited in areas of specialization and can work in numerous fields. Common industries that regularly employ Thermal Engineers include power companies, the automotive industry and commercial construction. While Thermal Engineers will generally spend most of their time working in an office they are often required to travel to the site of their current project.

The session was interactive with the students and the expert. The session ended with Memento distribution by Head of Department and vote of thanks by the final year student Pavan Kumar.
